The estimated one billion people living with disabilities worldwide face many barriers to inclusion in many key aspects of society. As a result, people with disabilities do not enjoy access to society on an equal basis with others, which includes areas of transportation, employment, and education as well as social and political participation.

The right to participate in public life is essential to create stable democracies, active citizenship and reduce inequalities in society.

International Day of Persons with Disabilities falls on the 3rd of December each year, with the aim of promoting empowerment, and helping to create real opportunities for people with disabilities. This enhances their own capacities and supports them in setting their own priorities. Empowerment involves investing in people – in jobs, health, nutrition, education, and social protection. When people are empowered they are better prepared to take advantage of opportunities, they become agents of change and can more readily embrace their civic responsibilities.
